

Sustainability In the Spanish Ports Strategic Plan

Álvaro Rodríguez Dapena
President
Puertos del Estado

STRATEGIC FRAMEWORK. SPANISH PORT SYSTEM

Dimensions

ECONOMICAL

ENVIRONMENTAL

SOCIAL

Criteria

Efficiency

Connectivity

Digitization

Innovation

Sustainability

Security

Transparency

Strategic lines

Port Authorities economically sustainable

Advanced Port land management

Infrastructures oriented to demand, reliable and connected.

Competitive services and efficient operations

Monitoring and facilitating Port activity

Effective and simple administrative procedures

Electronic Port Administration. Smart and synchromodal Ports

Innovative Ports

Ports with international projection

Green Ports

Eco-proactive Ports

Ports committed to the city

Safe Ports

High quality and advanced AtoN

Corporate ethics culture

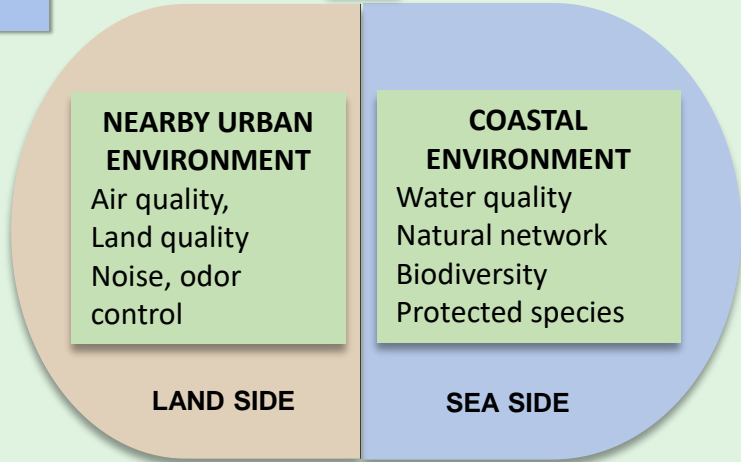

Extension and improvement of human resources

Dimensions

ENVIRONMENTAL DIMENSION

GLOBAL ENVIRONMENT
Zero balance emissions
Greenhouse gases....

LOGISTIC NETWORK
External costs reduction
concurrent transport modes

Port Authority

Strategic environmental assesment
Projects environmental assesments
Reporting (Marine Strategy...)

Environmental monitoring Plans

Infraestructuras development

PORT

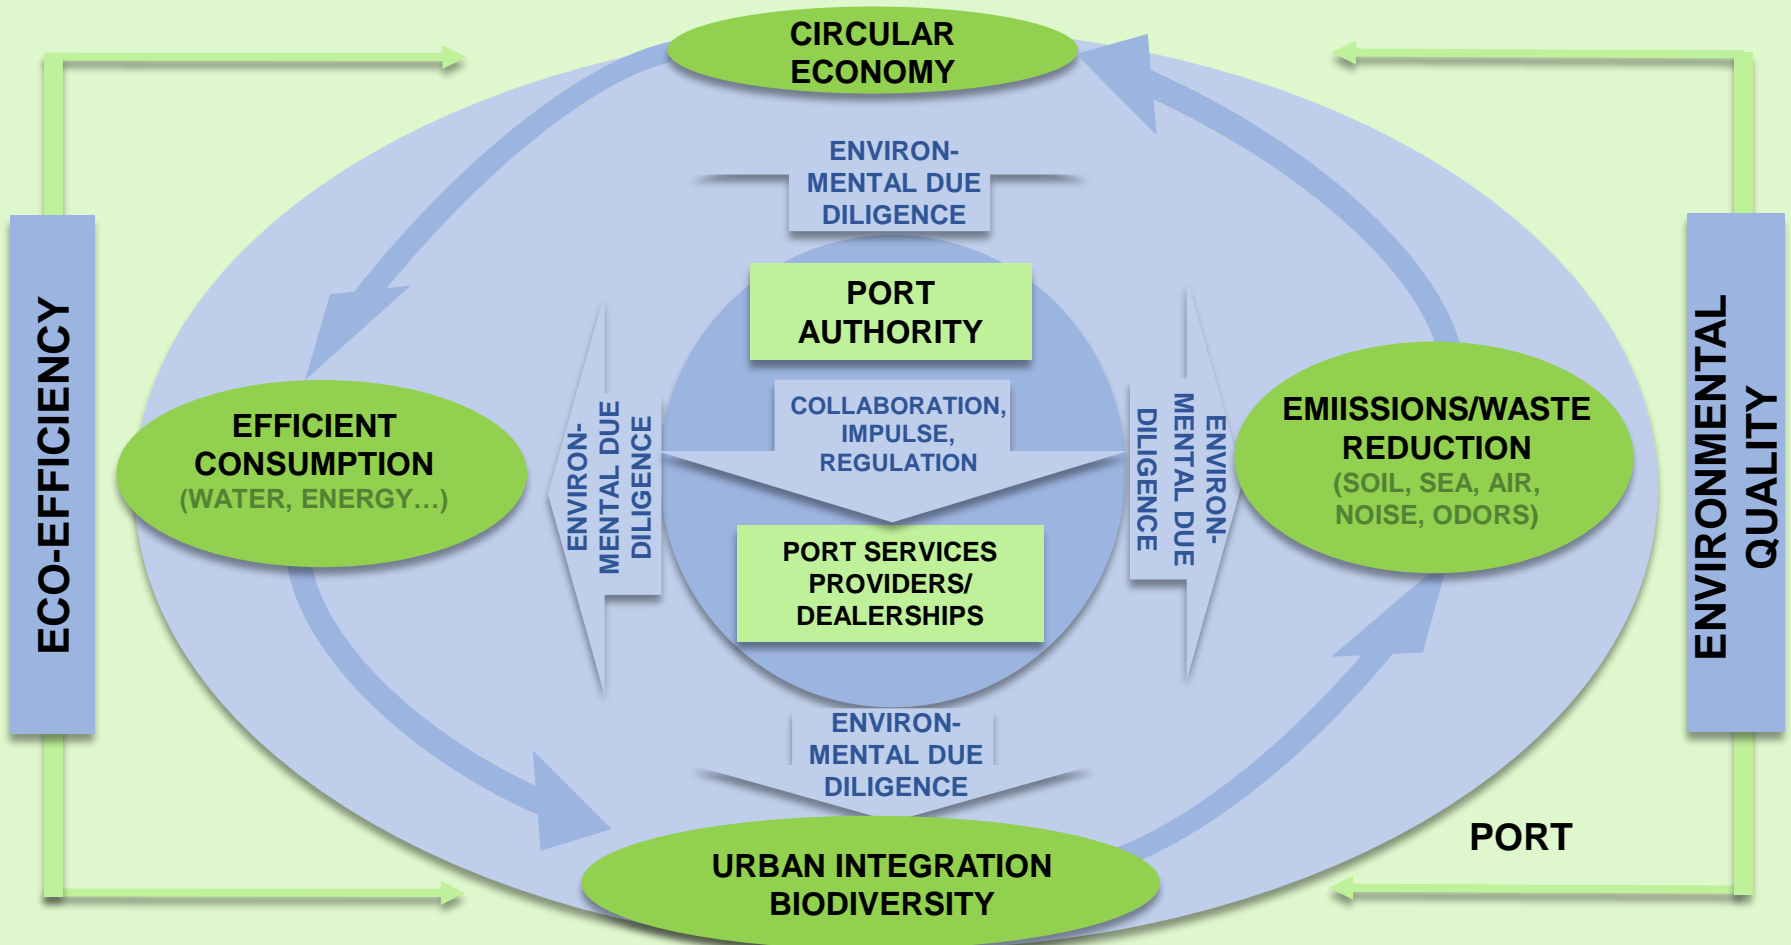

Exploitation

Climate change adaptation Plans

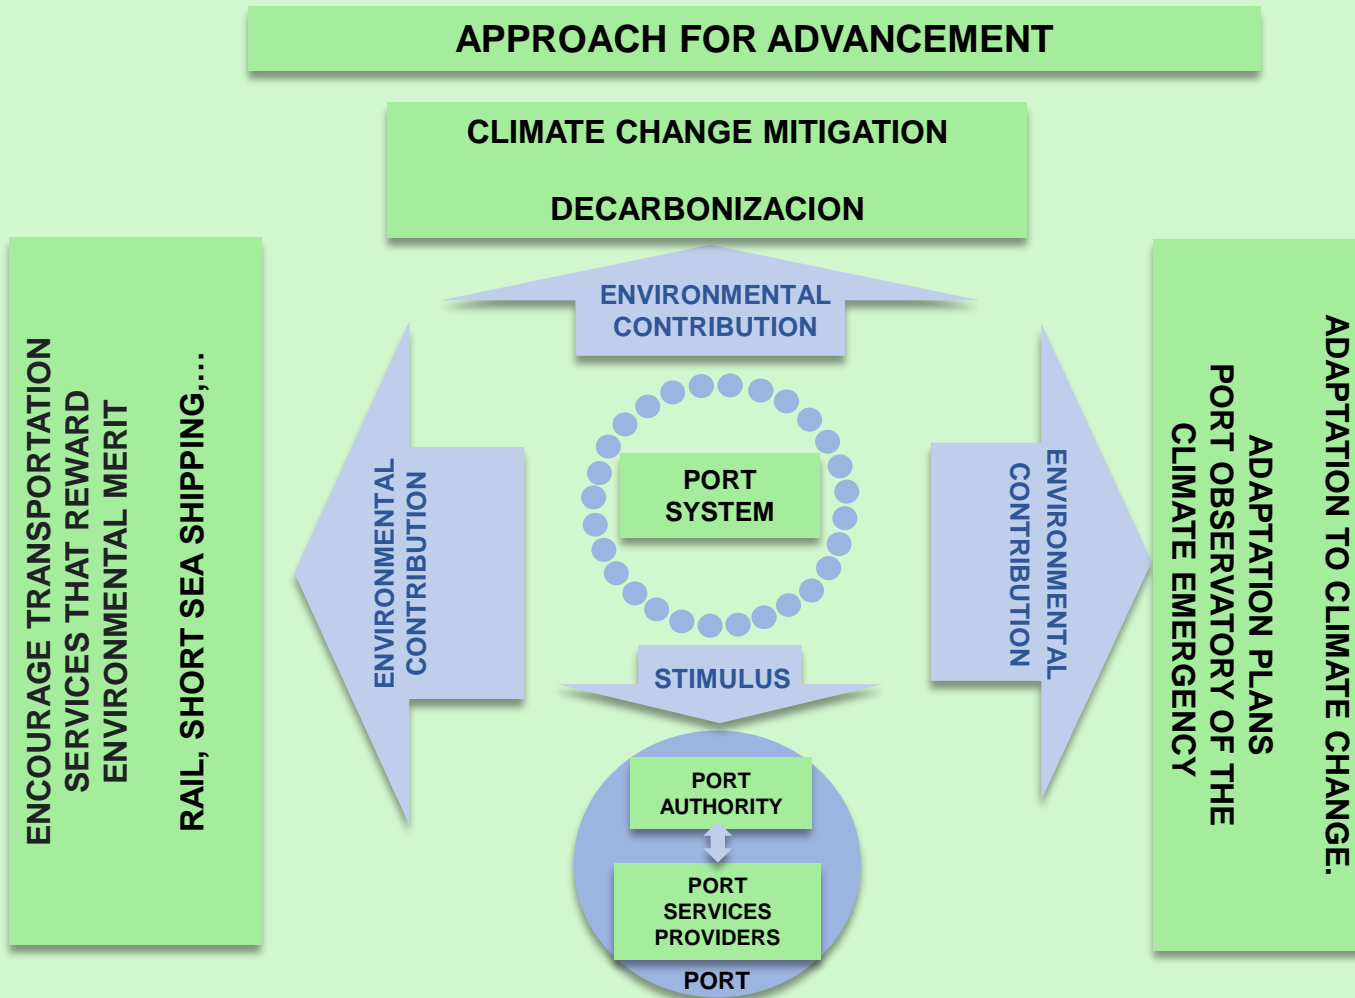

Environment quality control
Prevention of environ. affections
Eco-efficiency
Fight against climate change

Strategic line 10: Green Ports

APPROACH FOR ADVANCEMENT

Strategic line 11: Eco-proactive ports

Strategic line 11: Eco-proactive ports

EU REGULATION. GREEN DEAL

PORTS SIDE

DIRECTIVE 2014/94 DEPLOYMENT ON ALTERNATIVE FUELS INFRASTRUCTURES

- Transposition 2016
- National policy frameworks since 2016
- Goals (LNG, electricity...)

MARITIME SIDE

DIRECTIVES 1999/32/EC - 2012/33 REGARDING SULPHUR CONTENT OF MARINE FUELS

- SOx limits outside S/ECA:
- As from Jun 2014: 3,5% m/m
 - As from Jan 2020: 0,5% m/m

FIT FOR 55 PACKAGE

NEW REGULATION FOR ALTERNATIVE FUELS INFRASTRUCTURES AND REPEALING 2014/94

- On going
- National policy frameworks reviewed
- New goals

FUEL EU MARITIME INITIATIVE

EU EMISSIONS TRADE SYSTEM (ETS) REGULATION FOR MARITIME TRANSPORT

PORT COMPETITIVENESS

LOCATION AND ACCESIBILITY FACTORS

Production&consumption áreas (hinterland&foreland)

Logistic&transport corridors/chains

EXTERNAL FACTORS

Governance (central, local...)

Regulation framework.

Transport policies

Port-city relationship

Competitors: other ports...

Type of clients/sectors

INTERNAL FACTORS

Specific governance

Capacity of infrastructures/facilities

Level of performance

Price: port charges

Quality perceived: reliability,
flexibility, transparency...
